

Literacy Support Tools

Presented by Jason Burke, Don Johnston Company

HANDS-ON WORKSHOP

Wed, November 3, 2010 • 8:30 to Noon

Douglas ESD • Large Conference Room

Free of Charge • Class size is limited. Register early!

The Don Johnston Company is an industry leader in the development of software for students who struggle with reading and writing. Company representative, Jason Burke, will teach a hands-on workshop on the SOLO software suite, version 6. SOLO is a research, reading, studying, and writing process solution that incorporates ReadOutloud, DraftBuilder, CoWriter and WriteOutloud into a single suite of software. Come explore these great resources for providing access to instruction and instructional materials for your students! Computers will be provided for this hands-on training. Mr. Burke will also demonstrate the company's newer portable text-scanning and reading tools, the Intel Reader and the Classmate Reader, and showcase the Start-to-Finish accessible book collection. There is no fee for the workshop.

Register by October 27th. Class will be cancelled if fewer than 8 people pre-register. Please contact Terry Christenson at 440-4791 or terry.christenson@douglasesd.k12.or.us to register.
