**Mustek DV5600 Digital Camcorder Now Available with
Dock-n-Play™ Docking Station for TV & PC Playback,
Also Takes 5-Megapixel Digital Photos, Plays MP3s**

NEW YORK, NY (October 13, 2005) – Digital camcorders have rapidly grown in popularity because they provide consumers with high quality, easy-to-edit video. However, getting video from a “digicam” to a PC or television for viewing can be a time-consuming, frustrating task. Cables and cords, inputs and outputs, and complex software will try the patience of any budding Steven Spielberg or Martin Scorsese.

To resolve this dilemma, Mustek, a worldwide leader in consumer electronics, today introduced its DV5600 3.1 megapixel digital camcorder with the optional Dock-n-Play™ docking station equipped with wireless remote control. Amazingly simple to enjoy, the DV5600 brilliantly captures full-motion MPEG4/DivX video at 640 x 480 resolution with crystal clear audio. Best of all, once the moviemaking is complete, the video can be instantly transferred onto a PC or viewed on TV by just placing it into the new Mustek Dock-n-Play™.

-more-

While simultaneously recharging the DV5600's Li-ion battery, the Dock-n-Play uploads Motion-JPEG video files to a Windows® or Apple Macintosh® computer for viewing, or for editing with the included Ulead® VideoStudio™ software, direct printing of digital photos, burning onto a CD or DVD, or sharing as e-mail attachments. Plug the Dock-n-Play into a TV's composite video input and family and friends can watch the video on the large screen. Video, photos and audio can also be transferred using the DV5600's blazing fast USB 2.0 interface.

ALL-IN-ONE ENTERTAINMENT

Stylish, smart and affordable, the Mustek DV5600 redefines entertainment by featuring the key functions that consumers want most: digital video recording, digital photography, MP3 music playing and a digital voice recorder. Targeted at younger parents, students and business people, the DV5600 presents all its functionality within the context of a user-friendly interface and intuitive control dials.

At its heart, the DV5600 is a digital camcorder. Features such as 2.5-inch swivel "twist and flip" color display, 64MB of internal memory (expandable with SD or MMC media cards), 3.1 megapixel CCD sensor, 8X digital zoom and built-in microphone make the DV5600 a true video workhorse capable of capturing smooth, fluid video at frame rates of 30 FPS. Depending on memory and quality requirements, video can be set to 640 x 480, 400 x 304, or economical 352 x 269 sizes.

As a digital camera, the DV5600 excels. By opting to use the in-cam interpolation, photographers can capture JPEG images at resolutions as high as 2624 x 1968 or the equivalent of a 5 megapixel camera. High-grade features like a four-mode flash system to suit different lighting environments, auto-focus lens with selectable macro and standard mode focal ranges, image effects (negative, Sepia, Solarize, B&W, Pastel), PhotoExpress™ editing software, and 1/10s to 1/1000s shutter speeds assure professional photographic results.

In addition to photography and video making, the DV5600 plays MP3 music files via its built-in speaker or headphone jacks, captures WAV digital voice recordings and even doubles as a card reader/portable storage device.

PRICING AND AVAILABILITY

The Mustek DV5600 has an MSRP of \$ 199 (U.S.). The DV5600 Dock-n-Play is sold separately for \$49.99. Both are immediately available at leading on-line retailers including Amazon.com, Overstock.com and Target.com. Included with the DV5600 package are: an AV and USB cable, camera bag, installation and application CD, Li-ion battery, power adapter, user manual, lens cap with strap, hand strap, earphones and tripod.

About Mustek, Inc.

Founded in 1988, Mustek is a leading manufacturer of innovative imaging products integrating new technologies to improve and expand the consumer's ability to explore the future of digital vision. Mustek was first established with a focus on handheld and flatbed scanners. It has now grown to include an extensive line of consumer electronics such as digital cameras, digital camcorders, DVD players, home theater systems, portable electronics and computer peripherals. Located in Hsin-Chu, Taiwan, Mustek's manufacturing facilities are world leaders (by volume) of scanner production. Mustek USA is the North American arm of Mustek and is located in Irvine, California.
