Mustek In-Car Dual DVD Player Makes Summer Road Trips More Fun For Families

*-- Two Screen System Brings Mobile Fun To Cantankerous Kids, Plus Can Be
Separated For Use By Adults As A Portable DVD Player --*

IRVINE, CA, June 1, 2006 – Nearly eighty percent of family vacation travel in America is done by automobile. Time spent in a car with bored children is not fun, and fun is what family vacations are all about.

Mustek has come to the rescue with its new PD77, an affordable, easy to install DVD player system. This “backseat cinema” features two 7-inch LCD widescreens that mount snugly in harnesses behind front seat headrests, playing DVD movies, music CDs and Kodak® Picture CDs. Thanks to the PD77, kid’s favorites like Sponge Bob®, Shrek® or Elmo® can come along for the ride, whether it is across the country or across town. Best of all, with an MSRP of only \$199.99 the PD77 costs a small fraction of what new car dealers charge for built-in DVD player systems.

A guaranteed boredom buster, the PD77 is powered by the car’s 12V power supply. Two built-in stereo speakers deliver surround sound excitement on the go. There are also two sets of earbuds for headphone jacks so the kids can share the fun with each other but not the driver.

-more-

USE LCDs TOGETHER OR SEPARATELY

Unlike competitors' systems, the new PD77 does not have a separate DVD player that can be lost, stolen from the car, or broken during driving. Instead, the progressive-scan player is integrated into one of the two screen tablets, making for fewer cables. This unique design also permits the unit with the built-in DVD player to be used as a separate entertainment solution by mom or dad on an airplane, at home, or when riding a commuter train to work. There is even an A/V output for playing DVDs on a home theater system.

Picture quality on the 16:9 aspect ratio, active matrix TFT LCD screens is outstanding, even in bright sunlight. It brings to life all the exhilaration of today's DVDs. Antishock protection allows for a clear, static-free movie viewing on bumpy roads, while Dolby Digital Decoding assures superior audio performance.

Another cool feature is the optional DivX® movie playback support. With it, movies downloaded from on-line movie sites and burned onto DVDs can be viewed just like any other commercial DVD.

Pricing & Availability

The Mustek PD77 portable DVD player system is now shipping with an MSRP of \$199.99 (U.S.). Mustek products are sold at select retailers and on-line sites.
