

Mustek

GSmart 350

The Mustek GSmart 350 is the world's first camera to use CyberDisplay technology. This innovative display dramatically increases battery life and improves viewability of your images. The USB connection makes installation and image transfer quick and easy, and since power is provided from the USB port, no power adapter is required.

We've included all of the tools necessary in one easy-to-use package. Photo Express SE is ideal for all your image-editing needs, allowing users to create greeting cards, calendars, slide shows, screensavers and more. Also included is the QuickTime viewer from Apple which allows you to view short movies that you can make.

Small enough to fit in your pocket and ready whenever you are, the GSmart 350 is the perfect companion. Take a picture anywhere, any time, and capture precious moments that will last a lifetime.
